

January 12, 1976

a permit would ... at least they indicate that some responsibility is required on the part of anyone, whether hunting game animals and game birds, or non-game animals and game birds.

The point that Senator Syas brought out that it seems to be quite difficult for an enforcement officer to apprehend someone that's hunting game illegally when he comes forth with the idea that I'm just hunting jackrabbits, I'm hunting something else, when they actually are an illegal hunter. This way everyone is required to have a permit.

The issue was brought out that it's just a fund raising bill that would give more money to the Game and Parks Commission. We just as well admit that it is true, but if you'll notice the second page on the letter that came from the Commission, they estimate that the income to the Commission that we're talking about is not a large amount, but probably somewhere in the neighborhood of \$11,000. As we discussed the other day, I feel it's necessary that we do provide these extra funds in that we are requiring the Commission to provide for the citizens of Nebraska hunting facilities, boating facilities, the maintenance and the upkeep of our parks are provided for the benefit of the citizens of our state. I continue to maintain that this bill has been needed for a number of years. It's been with us before. I think it's time to pass this issue at this session.

Again, I move that LB 343 be advanced from General File to E & R initial.

PRESIDENT: Senator Keyes.

SENATOR KEYES: Mr. President, once again this is just a bill, as Senator Kremer got through saying, to raise revenue. The Game Commission has another bill that's going to raise, if they have their way, about \$9½ million. If they're willing to go out across the state and sell it, I'm willing to support them on it.

The second thing in this is that we are driving a wedge between certain groups of people. We're going to start it, not at 30, 40 or 50, but we're going to start it at 16 years of age and less. Simply, if your daddy happens to be a farmer and owns a piece of land you, a 16 year old boy or less, can go out and hunt on it. But if you happen to live in town, like Senator Stoney does, his kid can't go out without a license. If you want class legislation, this is it at its barest base. This is starting at 16 and under to get class legislation in Nebraska. If you want it go ahead and support it. If you don't want it, why don't support it.

PRESIDENT: Senator Schmit.

SENATOR SCHMIT: A question, Mr. President, of Senator Kremer. Senator Kremer, can you tell me why you differentiate between the individual who lives on the land and the person who does not. Also, can you tell me why it would not be possible for the farmer to hunt on land that he owns, or to control predators, perhaps, on any land that he owns?
